CAREER SUMMARY

B.Tech student specializing in Computer Science (AI & ML) with hands-on experience building machine learning models using Python, scikit-learn, and deep learning frameworks, as well as full-stack web development using the MERN stack. Developed predictive analytics pipelines, NLP-based AI applications, and full-stack web applications.

Seeking ML/AI Engineer or Full-Stack Developer internship roles to apply model training, data preprocessing, and full-stack development skills to real-world problems.

EDUCATION

COER University, Roorkee

2023 – 2027

B.Tech – Computer Science (AI & ML)

CGPA: 8.20 / 10

TECHNICAL SKILLS

Languages: Python, C, Java, JavaScript (ES6+)

ML / DL: scikit-learn, NumPy, pandas, Matplotlib, Supervised Learning, Predictive Modeling

NLP: TF-IDF, Cosine Similarity, NLP Pipelines, Text Preprocessing

Web Development: HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB (MERN Stack), WebAR, Firebase, Netlify, Streamlit

Tools & Platforms: MySQL, Git, GitHub, VS Code, Postman

Concepts: Model Training, Data Preprocessing, Cross-validation, ATS Systems, RESTful APIs, Data Structures & Algorithms

PROJECT EXPERIENCE

MERN Job Portal

2026

Technologies: React.js, Node.js, Express.js, MongoDB, JWT, Tailwind CSS | Live: [mern-job-portal-lexur.vercel.app](#)

- Built a full-stack job portal with a three-role system (Candidate, Company, Admin), each with dedicated dashboards and permissions.
- Implemented secure JWT-based authentication and role-based access control across all three user types.
- Migrated backend database from local MongoDB to MongoDB Atlas and deployed the application on Vercel.

AI-Powered Resume vs Job Description Matcher

2025

Technologies: Python, Streamlit, Scikit-learn, TF-IDF, Cosine Similarity, NLP

- Built an NLP-based web app that analyzes resumes against job descriptions using TF-IDF vectorization and Cosine Similarity to generate an ATS match score.
- Provides matched skills, missing skills, and actionable improvement tips to help users optimize their resumes for ATS systems.
- Deployed as an interactive Streamlit app, demonstrating end-to-end NLP application development.

Credit Risk Assessment Model

2024

Technologies: Python, scikit-learn, pandas, NumPy, Matplotlib

- Built a binary classification ML model to predict loan default probability from financial attributes (income, debt ratio, credit history).
- Achieved ~85% classification accuracy on held-out test data using logistic regression with cross-validation.
- Demonstrated practical ML application in fintech decision-support, reducing false-negative risk in loan approvals.

Sales Prediction Model

2024

Technologies: Python, scikit-learn, pandas, NumPy

- Developed a regression-based ML model to forecast product sales from 12+ months of historical data, identifying seasonal trend patterns.
- Reduced demand forecast error by ~20% compared to a naive baseline, supporting inventory planning decisions.

INTERNSHIP EXPERIENCE

MERN Stack Development Intern – FutureX (Techrays Labs)

2026

- Completed a hands-on MERN stack development training & internship program as a Programmer Analyst Intern, gaining production-level skills in JavaScript (ES6+), Node.js, Express.js, MongoDB/Mongoose, and React.js.
- Delivered the MERN Job Portal capstone project as the internship's final submission (see Project Experience).

AI & Machine Learning Intern – YBI Foundation

Jun 2024 – Aug 2024

- Executed end-to-end ML workflows: data ingestion, preprocessing (handling missing values, encoding), model training, hyperparameter tuning, and evaluation.
- Applied supervised learning techniques to real-world datasets, achieving measurable improvement in model performance metrics (accuracy, F1-score).
- Gained practical exposure to ML pipelines using Python, pandas, and scikit-learn.

CERTIFICATIONS

- Complete JavaScript – KnowledgeGate (Score: 80%, 2026)
- MERN Stack Development Training & Internship – FutureX by Techrays Labs (2026)

ACHIEVEMENTS

- Solved 50+ problems on LeetCode as part of structured DSA placement preparation.
- Participant – Naukri Campus Young Turks 2025 Skill Contest.
- Delivered 6 independent AI/ML and web development projects as a first/second-year undergrad.

CORE COMPETENCIES

Analytical Problem Solving • Team Collaboration • Adaptability • Technical Communication
